                                                                                                                                                                                                                                                                                                                                                                                                 US-10-069-772-2 (1-377) x ABL58600
                                                                                                                                                                                                                                                                                                                                                                                                                      CC comprising a Bequence encoding a plant enzyme that is a delta-12 (C desaturase, delta-12 hydroxylase, or delta-12 fatty acid hydroxylase.) CC Chimeric genes comprising nucleic acids of the invention are used to CC create transgenic plants with altered levels of unsaturated fatty acids, and can modify plant lipid composition. Nucleic acids of the invention CC can be used as hybridisation probes to isolate or amplify nucleotide cc sequences encoding other fatty acid desaturases or fatty acid desaturase. CC related enzymes. They can also be used in restriction fragment length CC polymorphism (RFLP) breeding to obtain altered levels of oleic acids in CC seed oil of oil producing plant species. They can also be used to produce seed oil containing altered levels of unsaturated fatty acids. Nucleic cacids of the invention can combine the high oleate trait of transformed CC seed with mutations for altered fatty acid compositions to obtain new CC total saturates and high in monounsaturates would provide significant CC health benefits to consumers (reduced risk of Coronary heart disease) as well as economic benefits to oil processors. The current sequence
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                New nucleic acid encoding delta-12 desaturase, delta-12 hydroxylase, delta-12 fatty acid hydroxylase for creating transgenic plants and producing seed oil with altered levels of unsaturated fatty acids.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Lightner

ARSULT NO. SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONTROL OF THE SECOND CONT
                                                                   CC in plant seeds and comprising a seed-specific regulatory sequence linked to ceither a mutant delta-12 or delta-15 fatty scid desaturase (FAD) gene CC either a mutant delta-12 or delta-15 fatty scid desaturase (FAD) gene CC encoding a protein with a mutation in a His-(ABD)dil)-Cys-(GlyAhla)-His CC amino acid region. (I) encodes a mutant delta-12 or a mutant delta-15 CC FAD. Expression of this construct in plants decreases the level of CC activity of these enzymes in the cells of the plant i.e. the construct CC gene is used to decrease the level of linoleic acid in the seeds of CC glants to (soybean, rapeseed, sunflower, oil palm, coconut palm, flax, CC setor and peanut) Similarly a construct comprising a mutant delta-15 CC gene is used to decrease the levels of lapha-linolenic acid in the seeds of CC gene is used to decrease the levels of palm, coconut palm, flax, CC gene is used to decrease the levels of alpha-linolenic acid in the seeds of CC plants, especially Brassica canola. The new method may also be used to the levels of both linoleic and alpha-linolenic acid simultaneously in CC their seeds. These methods alter the nutritional value of the seeds of CC diagnostic markers in plant genetic mapping and plant breeding programs. CC diagnostic markers in plant genetic mapping and plant breeding programs. CC mutant D form of microsomal delta-13 farty acid desaturates of CRNAP) comprises the sequence represents a Brassica napus CNNA which encodes the mutant D form of microsomal delta-13 farty acid desaturates of CRNAP)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                114

CC
CC This DNA sequence codes for canola microsomal delta-12 fatty acid CC desaturase (PAD) F form (see AAW24997). Plants are claimed that contain a CC mutation in the delta-12 FAD gene. A preferred mutation is in the region CC encoding a conserved motif (see AAW24994) of delta-12 FADs. A T to A CC transversion at nucleotide 515 of the canola delta-12 FAD gene (see CC AAT85849) results in a Leu to His amino acid substitution that CC contain the enzyme and alters the fatty acid composition of the seed CC oil (see AAW24998). Mutant plants, preferably canola and sunflower, that CC contain the mutation are obtained by conventional mutagenesis of plant CC canother conserved motif (see AAW24996) of delta-12 FAD and also into CC delta-15 FAD. The mutant plants produce oils of low saturated fatty acid content (maximum 5%, with not over 2% erucic acid), high oleic acid content (at least 71%) and low linoleic acid content. The content of CC palmitic acid may be high or low. The vegetable oils can be used in food production and should help to reduce the incidence of coronary heart CC field)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Example 12; Page 71-72; 88pp; English
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Mutated Brassica or Helianthus delta-12 or -15 fatty acid desaturase genes - and plants containing them, having altered fatty acid content seed oil, especially low saturates but high oleic acid content.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                14-DEC-1995;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         13-DEC-1996;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        19-JUN-1997.
